

International internships offer unique value: students are able to acquire the work experience they need to compete in the professional job market and the multicultural life experiences that will contribute to their long term professional success.

Employers today are facing a 37% skills gap between what they want in entry-level employees and what the typical entry-level candidate can offer. Strengthening student career readiness, defined by the National Association of Colleges and Employers (NACE), as “the attainment and demonstration of requisite competencies that broadly prepare college graduates for a successful transition into the workplace” will close this persistent skills gap.

International Internships provide students the unique opportunity to shape their career readiness through a work experience abroad. In the process, they develop an international professional network before joining the full-time workforce. Further, they simultaneously begin to acquire the intercultural competence, foundational skills, and emotional intelligence today’s employers are seeking in their employees. The outcome is a qualified college graduate who successfully makes the critical transition from student to professional.

Shorter job search duration

Lower probability of unemployment

More stable job positions

Better job matches

Greater job satisfaction

Increased earnings over a lifetime

- Evaluating, supporting, and organizing the execution of events

Competency & Skill Development

CEA Internships Abroad aligns each internship and the seminar course to the skills essential for graduates to be considered career ready by the National Association of Colleges and Employers (NACE).

Below is an example of some of the competency and skill development a CEA Internship Abroad has included in past placements. Each internship will focus on the unique goals of the intern and industry which will be identified throughout the interview and coaching process.

Industry Specific Competency & Skill Development:

1. Manage social media and website improvements.
2. Conduct market research analysis.
3. Create and implement a sales strategy for organizational expansion.

NACE Competency & Skill Development:

CEA guarantees placements to qualified students based on each students' readiness to participate in an internship abroad. Evaluation of readiness will be conducted throughout the pre-departure and internship placement process. Further details will be provided to accepted internship students.
